

bindings/python/qrngmodule.h

```
graph BT; bind(bindings/python/bind.c) --> header(bindings/python/qrngmodule.h); qrng(bindings/python/qrngmodule.c) --> header;
```

The diagram illustrates a file dependency structure. At the top is a header file, 'bindings/python/qrngmodule.h', enclosed in a grey-shaded box. Below it are two source files: 'bindings/python/bind.c' on the left and 'bindings/python/qrngmodule.c' on the right, both in white boxes. Two blue arrows point from the top of each source file box up to the bottom of the header file box, indicating that both source files include or depend on the header file.
